MEMORANDUM

To: Homeowners
RE: Dog Waste Stations
FROM: Pam Ward, Property Manager
DATE: July 27, 2011

The Board of Directors for Glenkirk Estates HOA has approved the installation of up to nine dog waste stations in the common areas of the community between Glenkirk Road and Rollins Ford Road. They will be serviced weekly by a contractor so that there is always a supply of waste bags. The trash cans will be emptied weekly to keep the receptacles clean.

We are in the process of determining the best location for the stations so that they are accessible by residents but not where they are offensive. We are hoping to get some input from a few interested homeowners, preferably dog walkers, who might know where the waste stations will be the most helpful. The Board of Directors has authorized a committee consisting of three to seven homeowners to be appointed to complete this task. It should involve one or two meetings at the most and a report to the Board with recommendations. If you are interested in volunteering to serve on the committee, please email Michelle Goard at MGoard@TWCManagement.com by August 10, 2011.

We hope to have this task completed within the next few weeks so that the waste stations can be installed in September.
